

GAM Star Fund plc. GAM Star Global Balanced Institutional GBP Accumulation

Marketing Material - Data as of 31.08.2020

NAV per share GBP 16.4055

Fund description

Investment objective:

The investment objective of the Fund is to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), Fixed Income Securities (with no restriction on the minimum credit rating), property, commodities and currencies.

Opportunities:

A highly qualified and experienced management team actively manages the Fund on the basis of a fundamental valuation approach. The objective is to identify the potential investments that, in the Investment manager's opinion, are most attractive and to generate interesting and profitable opportunities for investors. The Fund invests in a broadly diversified investment universe and seeks opportunities for returns wherever they exist.

Risk factors:

Credit Risk / Debt Securities: Bonds may be subject to significant fluctuations in value. Bonds are subject to credit risk and interest rate risk.
Equity: Investments in equities (directly or indirectly via derivatives) may be subject to significant fluctuations in value.
Operational Risk / Third Parties: Investments in other Funds have direct and indirect dependence on other service providers. The Fund may suffer disruption or loss in the event of their failure.
Liquidity Risk (Fund of Funds): Investments in other Funds are subject to the liquidity of those underlying funds. If underlying Funds suspend or defer payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.
Capital at Risk: All financial investments involve an element of risk. Therefore, the value of the investment and the income from it will vary and the initial investment amount cannot be guaranteed.
Brexit Risk: The regulatory regime to which certain of the Investment Managers are subject to in the UK could be materially and adversely affected. The decision to leave the EU could also result in substantial volatility in foreign exchange markets and a sustained period of uncertainty for the UK, the EU and the global markets in general.

Calendar year performance

Key to charts and tables:

Fund: GAM Star Global Balanced - Institutional GBP Accumulation; Benchmark: Lipper Global Mixed Asset GBP Balanced; Cash Index: Average GBP 1 Month Deposit Rate

Past performance is not an indicator of future performance and current or future trends. The performance values refer to the net asset value and are calculated without the commission and costs incurred on issue, redemption or swapping (e.g. transaction and custody costs of the investor). The fund does not include the security of capital which is characteristic of a deposit with a bank or building society. The indications are based on figures denominated in GBP. If this currency is different from the currency of the country in which the investor is resident, the return may increase or decrease as a result of currency fluctuations.

Defaqto 5 Diamond Rating applies to our GAM Star Global Managed Fund Solutions range only. Defaqto is an independent financial information business and ratings should not be taken as recommendation.

Model asset allocation breakdown

GAM MFS Global Balanced Portfolio – This strategy is designed for clients seeking a balance of capital protection and participation in equity market growth. The Fund may gain exposure in the range of 40-85% of net assets to collective investment schemes which invest in equities; and has no minimum fixed income or cash requirement. It is intended that the Fund will maintain a diversified exposure to equities, fixed income, absolute return and alternative collective investment schemes.

Glossary

Alpha: The intercept derived from linear regression usually described as the manager's added value over benchmark.

Benchmark: an index that can be used by an investment fund as the basis of comparison for assessing the performance achieved.

Beta: a measure of the volatility of the performance of an investment relative to the performance of the underlying market. An investment with a beta of 1 indicates that its performance will move up or down in line with the performance of the market. An investment with a beta of more than 1 means that its performance rises and falls more than that of the market; beta of less than 1 means that its performance rises and falls less than that of the market.

Correlation: a statistic measurement which shows the linear relationship (or degree of parallel movement) between two series of figures, for example the performance of two equity investments.

Funds of Funds: these are investment funds which invest their fund assets in other target funds.

Maximum drawdown: measures the largest loss experienced by a fund or an index, peak to trough, during a stated time period.

Ongoing charge: the ongoing charge is a measure of the annual expenses incurred by a fund and is expressed as a percentage. It allows an accurate comparison of the costs of funds from different companies to be made.

Risk rating: the risk indicator is based on the volatility of the Fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by proxy fund, benchmark data or a simulated historical series as appropriate. This profile is determined using historical data, as such may not be a reliable indication for the future risk profile. It is not guaranteed and may shift over time. The lowest category does not mean 'risk free'.

Sharpe ratio: the Sharpe ratio (risk-adjusted performance) is generated by calculating the difference between the average annualised return and the risk-free return. The resulting figure is divided by the annualised standard deviation of the returns. The higher the Sharpe ratio, the better the fund performance in relation to the risk potential of its portfolio.

Standard deviation: measures the dispersion of a set of data around its mean. In investment terms, it is a measure of the dispersion of a fund's performance around its mean and therefore, the volatility or risk associated with the investment. The higher the standard deviation of an investment, the greater the variability of performance over the period.

Important legal information

Source: GAM, unless otherwise stated. (Where applicable and, unless otherwise noted, performance is shown net of fees, on a NAV to NAV basis). GAM has not independently verified the information from other sources and GAM gives no assurance, expressed or implied, as to whether such information is accurate, true or complete.

Nothing contained herein constitutes investment, legal, tax or other advice, nor is it to be solely relied on in making an investment or other decision. This document qualifies as marketing material.

The views expressed herein are those of the manager at the time and are subject to change. **The price of shares may go down as well as up and the price will depend on fluctuations in financial markets outside GAM's control. As a result an investor may not get back the amount invested. Past performance is not indicative of future performance and reference to a security is not a recommendation to buy or sell that security. Allocations and holdings are subject to change.**

This is not an invitation to invest in any GAM product or strategy. Investments should only be made after a thorough reading of the current prospectus, offering memorandum, the Key Investor Information Document "KIID", the articles of association and the current annual and semi-annual reports (the "legal documents"), as well as after consulting an independent finance and tax specialist. The legal documents can be obtained in hard copy and free of charge from the addresses indicated below.

Some of the sub-funds may not be registered for sale in all jurisdictions. Therefore, no active marketing must be carried out for them. Subscriptions will only be received and shares or units issued on the basis of the current fund prospectus.

Shares of the fund have not been registered under the US Securities Act of 1933, as amended (the "Securities Act") and the fund is not registered under the US Investment Company Act of 1940, as amended (the "Company Act"). Accordingly, such shares may not be offered, sold or distributed in the United States or to US persons unless an exemption from registration under the Securities Act and the Company Act is available. In addition, certain GAM products are closed to all US investors.

This material/presentation mentions one or several sub-funds of GAM Star Fund p.l.c., registered office at George's Court, 54-62 Townsend Street, Dublin 2, Ireland, an umbrella investment company with variable capital and segregated liability between the sub-funds, incorporated under the laws of Ireland and authorised by the Central Bank of Ireland (CBI) as a UCITS Fund in accordance with the Directive 2009/65/EC. Management Company is GAM Fund Management Limited, George's Court, 54-62 Townsend Street, Dublin 2, Ireland.
