A sub-fund of BlackRock Strategic Funds

Class D2 GBP Hedged

ISIN: LU1191063897

Management Company: BlackRock (Luxembourg) S.A.

## Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment through a combination of capital growth and income commensurate with a relatively high level of risk and in a manner consistent with the principles of environmental, social and governance (ESG) investing.
- ▶ The Fund will seek to achieve its investment objective by obtaining indirect exposure to equity securities (e.g. shares), equity-related (ER) securities, fixed income (FI) securities (such as bonds), FI-related securities, alternative assets (such as property and 'hard' commodities, but excluding 'soft' commodities), cash and deposits. FI securities include money market instruments (MMIs) (i.e. debt securities with short term maturities). ER securities and FI-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). 'Hard' commodities are commodities which are natural resources that are mined or extracted (e.g. gold, aluminium, copper, oil and natural gas) and 'soft' commodities are commodities which are agricultural products or livestock (e.g. corn, wheat, coffee, sugar, soybeans and pork).
- ▶ The Fund seeks to invest at least 80% of its total assets in accordance with its ESG Policy as disclosed in the Fund's ESG Policy in the prospectus.
- ▶ It is intended that the Fund's exposure to equity securities will not exceed 90% of its net asset value, however, this exposure may vary over time.
- ▶ Exposure to these asset classes will be achieved through the Fund's investments in other funds globally, including exchange traded funds and other index funds managed by the BlackRock Group and, when determined appropriate, the Fund may invest directly in FI-related securities, FI-securities, MMIs, cash and deposits.
- ▶ The Fund's direct investments in FI securities and MMIs may be issued by governments, government agencies, companies and supranationals. Any exposure (direct or indirect) to FI securities which have a relatively low credit rating or are unrated may not exceed 20% of the Fund's net asset value.
- ▶ The Fund is actively managed, the investment adviser (IA) has discretion to select the Fund's investments and is not constrained by any benchmark. Shareholders may use the MSCI All Country World Index and Bloomberg Multiverse Index (the "Index") to measure the Fund's performance against its ESG commitments. The Fund's asset allocation and the weight of each asset class index in the investable universe may change over time. Shareholders may contact the IA for details and weights of the indices used.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is Euro. Shares for this class are bought and sold in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the base currency of the Fund. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$100,000 or other currency equivalent.

## Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
  - ▶ The risk category shown is not guaranteed and may change over time.
  - ▶ The lowest category does not mean risk free.
  - ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
