Growth Strategy

31 December 2025

Objective and policy

Seek to provide long-term capital growth through investment in a portfolio of funds investing across the capital markets but with a higher exposure towards equity based assets and therefore a higher level of volatility over the longer term. This Fund operates a strategic growth investment strategy where equity exposure is likely to range from 75% - 85%.

The policy of the Fund is to invest in collective investment funds managed by a range of carefully selected fund managers. These underlying funds, in turn, invest across the capital markets in asset classes including bonds, equities, property, commodities and cash. The Fund may also hold cash deposits to enable Shares to be repurchased or for the efficient management of the Fund.

Risks

The value of investments and the income from them can go down as well as up and cannot be guaranteed. Investments in a currency other than the shareholder's own currency, or in a fund that invests in securities denominated in currencies other than its own base currency, will be subject to the movements of foreign exchange rates, which may cause an additional favourable or unfavourable change in value. Consequently, Shareholders might not get back the amount originally invested. Dividends, where payable, are not guaranteed and may fluctuate in money terms. Shareholders should consider holding the investment on a medium to long-term basis, being a minimum of five years but preferably ten years or more.
